Summary

Recent Computer Science graduate with a strong foundation in full-stack development, machine learning, and API integration. Passionate about building user-focused, scalable applications using React, Django, and Python.

Skills

Frontend: React.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS

Backend: Django, Python, SQLite3, REST APIs

Tools: Git, GitHub, Postman, Figma, Vercel, Google Maps API

Other: Agile Development, Team Collaboration, Debugging, Problem Solving

Projects

- ShareBite – A real-time food-sharing platform built with Django and React, featuring Google Maps geolocation and admin management of drop-off points.
- Pothole Detection with CNN – Machine learning system using TensorFlow and OpenCV to identify potholes in road images.
- EcoNuclearHub – Group ecommerce project built with Django (backend) and Bootstrap (frontend), designed to sell eco-friendly products like humidity equipment.

Experience

AppTech Lagos – Software Support Intern

June 2022 – August 2023

- Maintained and updated computer software
- Debugged issues and supported technical tasks

Education

Beng Software Engineering – University of Bolton

Graduated: July 2025 | Classification: 2:1
